ATMOSPHERIC ENVIRONMENT

Volume 33
1999

Volume Contents, Author Index and Subject Index

PERGAMON

ATMOSPHERIC ENVIRONMENT

SCOPE

The subject matter of papers published in *Atmospheric Environment* covers all aspects of the interaction of people and ecosystems with their atmospheric environment. This includes scientific, administrative, economic and political aspects of these interactions. The main aim of *Atmospheric Environment* is to provide a scientific understanding of the consequences of natural and human-induced perturbations on the Earth's atmosphere. Areas covered include but are not limited to air pollution research and its applications, air quality and its effects, dispersion and transport, deposition, biospheric-atmospheric exchange, global atmospheric chemistry, radiation and climate. Novel results based on experiments, theory and modelling of the atmosphere, extending from the local to global scales, are included. *Atmospheric Environment* publishes research and review papers, special issues and other invited and contributed columns:

New Directions A monthly column reporting on late-breaking, controversial, or speculative issues in all aspects of the atmospheric sciences. Editor: Dr W. Sturges, *Norwich, UK* (E-mail: new.directions @uea.ac.uk).

Fast Track Papers A route for rapid publication of manuscripts that are especially urgent.

Short Communications and Technical Notes Papers that cover topics which may be simpler in structure or of more limited interest, sometimes reporting unusual observations.

Millennial Review papers Authoritative reviews in the general field of air pollution.

Atmospheric Environment International A series of special issues placing air pollution research in a regional context. The following regions will be covered: Africa and Middle East, Asia and Japan, Australia and New Zealand, Central and South America, Eastern Europe, North America, Western Europe.

Thirty issues of *Atmospheric Environment* are published annually.

Authors are referred to the Preparation of Papers guidelines, printed in the first issue of each volume, for advice concerning the preparation of their manuscript. Submission of papers on disk is encouraged and the rapid publication of select and timely papers is also possible.

Contributions can be made to any of the Executive Editors listed below. However, authors are encouraged to target their papers as much as possible. Asian contributors can submit manuscripts to U.K. or North American editors as they wish. The following guidelines are suggested, based on geography and subject areas:

I. Papers from *Europe, Africa, Australasia and Asia* should be typically submitted to:

PROF. P. BRIMBLECOMBE — *School of Environmental Sciences. University of East Anglia, Norwich NR4 7TJ, U.K.* e-mail: atmos_env@uea.ac.uk

II. Papers from *North America, South America and Asia* should be typically submitted to:

DR H. B. SINGH — *Earth System Science Division, MS* 245-5, *NASA Ames Research Center, Moffett Field, CA* 94035, *U.S.A.* (photochemical pollution, trace chemicals and fate, global change, atmospheric chemistry, modelling and other relevant subjects).

DR A. S. LEFOHN — *A.S.L. & Associates*, 111 *North Last Chance Gulch, Helena, MT* 59601, *U.S.A.* (air pollution effects on human health and ecosystems, air quality characterization and trends; indoor pollution; New Directions column, dispersion modelling, and other relevant subjects).

Author Services Department

For queries relating to the general submission of articles (including electronic text and artwork) and the status of accepted manuscripts, please contact the Author Services Department: *E-mail*: authors@elsevier.co.uk; *Fax*: + 44 (0) 1865 843905; *Tel*: + 44(0) 1865 843900.

Published semi-monthly with extra issues in February, April, June, August, October and December

Publication information: Atmospheric Environment (ISSN 1352–2310). For 1999, Volume 33 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.elsevier.nl/locate/atmosenv). Further information is available on this journal and other Elsevier Science products through Elsevier's website: (http://www.elsevier.nl). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

© 1999 Elsevier Science Ltd. All rights reserved

Periodicals postage is paid at Rahway, NJ. Atmospheric Environment (ISSN 1352–2310) is published (semi monthly with extra issues in February, April, June, August, October and December) by Elsevier Science Ltd., The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The US subscription price is $3561.00 per year.

POSTMASTER: Send address corrections to: Atmospheric Environment, Elsevier Science, Customer Support Department, PO Box 945, New York, NY 10159-0945.
Distributed in the USA by Mercury Airfreight International, 365 Blair Road, Avenel, NJ 07001.

Disclaimer: Whilst every effort is made by the Publishers and Editorial Board to see that no inaccurate or misleading data, opinion or statement appear in this Journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the Publishers, the Editorial Board and Editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

CONTENTS OF VOLUME 33

Number 1

G.C.K. Lam, D.Y.C. Leung, M. Niewiadomski, S.W. Pang, A.W.F. Lee and P.K.K. Louie	1	Street-level concentrations of nitrogen dioxide and suspended particulate matter in Hong Kong
J.P. Kunsch	13	Critical velocity and range of a fire-gas plume in a ventilated tunnel
I.V. Patroescu, I. Barnes, K.H. Becker and N. Mihalopoulos	25	FT-IR product study of the OH-initiated oxidation of DMS in the presence of NO_x
D.M. Holland, P.P. Principe and J.E. Sickles, II	37	Trends in atmospheric sulfur and nitrogen species in the eastern United States for 1989–1995
R.H. Grant and Ka-Lam Wong	51	Ozone profiles over a suburban neighborhood
R.C. Musselman and W.J. Massman	65	Ozone flux to vegetation and its relationship to plant response and ambient air quality standards
T. Salthammer, A. Schwarz and F. Fuhrmann	75	Emission of reactive compounds and secondary products from wood-based furniture coatings
H. Kaupp and M.S. McLachlan	85	Atmospheric particle size distributions of polychlorinated dibenzo-*p*-dioxins and dibenzofurans (PCDD/Fs) and polycyclic aromatic hydrocarbons (PAHs) and their implications for wet and dry deposition
R. Vecchi and G. Valli	97	Ozone assessment in the southern part of the Alps
N. Moschonas, D. Danalatos and S. Glavas	111	The effect of O_2 and NO_2 on the ring retaining products of the reaction of toluene with hydroxyl radicals
K. Koeltzsch	117	On the relationship between the Lagrangian and Eulerian time scale
J.L. Collett, Jr., K.J. Hoag, D.E. Sherman, A. Bator and L. Willard Richards	129	Spatial and temporal variations in San Joaquin Valley fog chemistry
G.L. Hutchinson, W.X. Yang and C.E. Andre	141	Overcoming humidity dependence of the chromium trioxide converter used in luminol-based nitric oxide detection
Technical Note		
C. Dimitroulopoulou and H.M. ApSimon	147	The influence of the photolysis rates on modelled ozone concentrations
Short Communication		
T.P. DeFelice	155	Chemical composition of fresh snowfalls at Palmer Station, Antarctica
Ö. Gustaffsson and P.M. Gschwend	163	Hydrophobic organic compound partitioning from bulk water to the water/air interface
New Directions		
S.F. Watts and C.N. Roberts	169	Hydrogen sulfide from car catalytic converters
News and Opinions		
Introduction	171	
Calendar	171	
List of Forthcoming Papers	I	
Preparation of Papers	III	

Number 2

B.R.T. Simoneit, J.J. Schauer, C.G. Nolte, D.R. Oros, V.O. Elias, M.P. Fraser, W.F. Rogge and G.R. Cass	173	Levoglucosan, a tracer for cellulose in biomass burning and atmospheric particles
A. El-Hussein, A. Mohammed and A.A. Ahmed	183	Radon exhalation and ultrafine fraction of radon progeny in closed room air
P.-L. Leung and R.M. Harrison	191	Roadside and in-vehicle concentrations of monoaromatic hydrocarbons
N.V. Heeb, A.-M. Forss and C. Bach	205	Fast and quantitative measurement of benzene, toluene and C_2-benzenes in automotive exhaust during transient engine operation with and without catalytic exhaust gas treatment
T.G.M. Demmers, L.R. Burgess, J.L. Short, V.R. Phillips, J.A. Clark and C.M. Wathes	217	Ammonia emissions from two mechanically ventilated UK livestock buildings
F. Sauer, C. Schäfer, P. Neeb, O. Horie and G.K. Moortgat	229	Formation of hydrogen peroxide in the ozonolysis of isoprene and simple alkenes under humid conditions
D. Blaha, K. Bartlett, P. Czepiel, R. Harriss and P. Crill	243	Natural and anthropogenic methane sources in New England
Y.F. Li, Y.J. Zhang, G.L. Cao, J.H. Liu and L.A. Barrie	257	Distribution of seasonal SO_2 emissions from fuel combustion and industrial activities in Shanxi province, China, with $1/6° \times 1/4°$ longitude/latitude resolution
R.A. Hashmonay, M.G. Yost and C.-F. Wu	267	Computed tomography of air pollutants using radial scanning path-integrated optical remote sensing
P.N. Price	275	Pollutant tomography using integrated concentration data from non-intersecting optical paths
A. Maurizi and F. Tampieri	281	Velocity probability density functions in Lagrangian dispersion models for inhomogeneous turbulence
B.L. Duffy, P.F. Nelson, Y. Ye and I.A. Weeks	291	Speciated hydrocarbon profiles and calculated reactivities of exhaust and evaporative emissions from 82 in-use light-duty Australian vehicles
R.M. Harrison, M. Jones and G. Collins	309	Measurements of the physical properties of particles in the urban atmosphere
D.R. Hastie, J. Narayan, C. Schiller, H. Niki, P.B. Shepson, D.M.L. Sills, P.A. Taylor, Wm. J. Moroz, J.W. Drummond, N. Reid, R. Taylor, P.B. Roussel and O.T. Melo	323	Observational evidence for the impact of the lake breeze circulation on ozone concentrations in Southern Ontario
Technical Note		
L. Thöni, F. Krieg and U. Siewers	337	Testing the Bergerhoff method to determine the bulk deposition loads of 49 elements
